Flood Assistance Rebate Program

South Holland has a long history of flooding, with our first flood occurring in 1990. This prompted the Village to prepare a Floodplain Management Plan. This plan, adopted in May 1994, provides for the financial assistance program outlined here to assist residents who take measures to reduce the damage caused by flooding.

This program offers residents a 25% rebate for flood control projects they undertake, such as:

- Installation of overhead sewers.
- Repair of foundation cracks.
- Installation of drain tiles.
- Elevation of landscaping for improved drainage.

The maximum rebate is \$2,500.00

For your protection, all work must be performed by contractors who are licensed and bonded with the Village of South Holland. You can receive a list of licensed/bonded contractors by calling the Planning and Development, and Code Enforcement Department at 210-2915.

Over the last six years, more than 400 residents have undertaken floodproofing projects through this program. The average rebate per project has been approximately \$500.00.

It is important to call before beginning any projects because **projects must be pre-approved.**

A short application and two bid proposals are required. Fred Block will conduct an on-site consultation to review your proposals from the contractors and assist in completing the application.
